

# Aquatone

Regular use of Aquatone is an excellent way of staying healthy and avoid being struck by disease or ailments. As Aquatone treatments are completely free of side effects, it is particularly suitable for personal use.

**R**esearch and extensive clinical practice has proven Aquatone to be very effective in treating urogenital diseases of the kidneys, urethra, urinary infection and prostate inflammation as well as cardiovascular problems such as hypertension, chronic shortage of oxygen and nourishment in the brain and for rehabilitation after stroke and heart attack. Treatment with Aquatone is also effective for inflammatory respiratory diseases such as bronchitis, pneumonia and for ear-nose-throat diseases such as sinusitis, lymphadenitis and deafness. Good results have also been achieved when treating diseases in the gastro-intestinal tract such as ulcer, gastric catarrh and lesion in the duodenal.

Other treatment areas for Aquatone are skin diseases such as eczema and sclerosis as well as arthritis, lumbar pain, frozen shoulder and sprains.

Aquatone also improves the condition when treating diseases in the peripheral and central nervous system and accelerates recovery after extensive physical exercise.

## RESEARCH

- **The Karolinska Institute (Stockholm, Sweden).**

- **Russian Academy of Sciences (Moscow).**
- **Saratov State Medical University**

**T**he above mentioned institutes and research centres have excellent renomé and are known for applying reaseach in line with the highest international standards.

As patients have shown good tolerance for Aquatone treatments and no harmful or side effects have arisen, Aquatone can safely be recommended for personal use at home.

Is there a universal method to restore health, prevent disease and slow down the aging process? Is there something that could help against disease and disorders of the joints and spine, chronic problems of various kinds, eye disease and allergies, insomnia, high blood pressure and even reduce wrinkles? Is there something that could also help athletes recover after intense workout?

Yes, there is such a method, discovered by Russian scientists in 1995, who discovered the "language" of the body's water molecules with which you can communicate and correct. What the scientists discovered was the body waters' resonance wave and its amplitude, which is very weak, short of only a centimeter in length.

In this context, it is important to remember that all matter is really only energy in motion which vibrates at a certain frequency, or with a number of fluctuations per second. The water molecule is also matter, as everything else in existence.

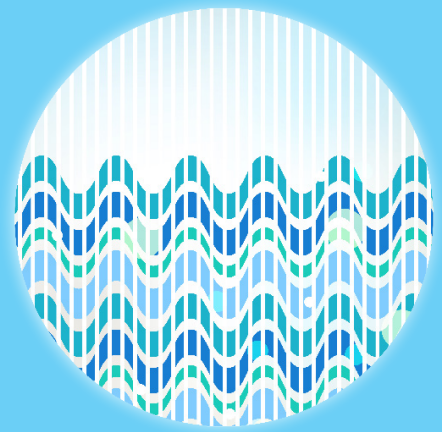

In this context, it is important to remember that all matter is really only energy in motion which vibrates at a certain frequency, or with a number of fluctuations per second. The water molecule is also matter, as everything else in existence.

All biochemical reactions, such as metabolism and other biological processes, both physiological and psychological, happen in the inner environment of the body, which consists of 75% of water.

Everything that happens in the body occurs in unison with and in presence of water molecules.

In ill health and disease, these vibrations, or resonance frequency, of water molecules deviate from the norm. It could be any kind of problem, complex diseases or facial wrinkles. With age, the frequency of water molecules change in the body and skin causing deteriorating health and dryer skin.

The discovery of water's resonance waves by the Russian company Telemak lead to the development of a therapeutic device called Aquatone. Aquatone emits the same radiation as is found in the aquatic environment of all living organisms, with an amplitude of maximum  $16 \times 10^{-8}$  watts.

Aquatone emits a radiation several thousand times less than that of a mobile phone. Despite its miniscule radiation, Aquatone is able to impact the body's environment and all its biochemical processes. This method, which improves the body's environment effectively and without side effects, creates enormous heal-

ing potential for each and every one. Aquatone affects all inner organs or body parts and restores health in diseased organs and systems in most illnesses. Aquatone's positive effects have been proven in more than 150 scientific studies performed over 14 years. You can find a number of these studies at [www.aquatone.se](http://www.aquatone.se).

The studies are based on laboratory tests performed at hospitals and clinics. Physicians praise Aquatone's efficiency and confirm its ability to reduce or completely eliminate a number of illnesses. The versatile treatments are possible as almost all disease is the result of deviant resonance in the water molecules of the affected body part. Resonance wave therapy has proven

particularly efficient in restoring damaged tissue after accidents, damage in the locomotor system, burns and radiation damage accompanied by pain. Resonance therapy with Aquatone also strengthens the immune system's ability to fight infections and inflammations of all sorts.

Sports physicians have also commented on how resonance therapy increases physical stamina and recovery after extensive physical exercise. Hidden reserves are thus mobilized without drugs.

## What is the difference between Aquatone and Triomed ?

### AQUATONE

For all bodily functions as Aquatone's electro-magnetic waves restore the resonance frequency of water molecules in blood and lymph, improve metabolism, limit inflammatory processes and slow down the aging process.

### TRIOMED

Triomed improves cell membranes, enabling cells to easier absorb nourishment and oxygen, thus strengthening the cells.

For example, if immune defence cells are fighting pathogens, strengthening their membranes makes the cells stronger.

Combining treatments with Aquatone and Triomed, strengthens the immune systems immensely, so that it becomes much easier for the body to destroy all kinds of pathogens such as virus and bacteria. In doing so, all biochemical processes are optimized - creating a very resilient body.

Institutet**

### STUDY BY THE KAROLINSKA INSTITUTE, STOCKHOLM, SWEDEN

In 2010, Människans Resurser AB took part in a research study at the Karolinska Institute called "Effects of a low-intensity electromagnetic field on fibroblast migration and proliferation" which showed positive results and was published in the American journal *Electromagnetic Biology and Medicine*, 30(2): 80-85, 2011.
