

# CELLVITAL-HOMECARE THERAPY

## CELLVITAL HOMECARE THERAPY:

Discover NOW all the  
benefits for a FULL  
healthy body.

- // boost your immune:  
reduce pain, inflammation  
and the effects of stress  
on your body
- // enhance your performances
- // improve your sleep quality
- // get more energy for your day

# What is Cellvital-Homecare Therapy?

//////////////////////////////////// Cellular Training //////////////////////////////////////

## Cellvital-Homecare THERAPIE ...

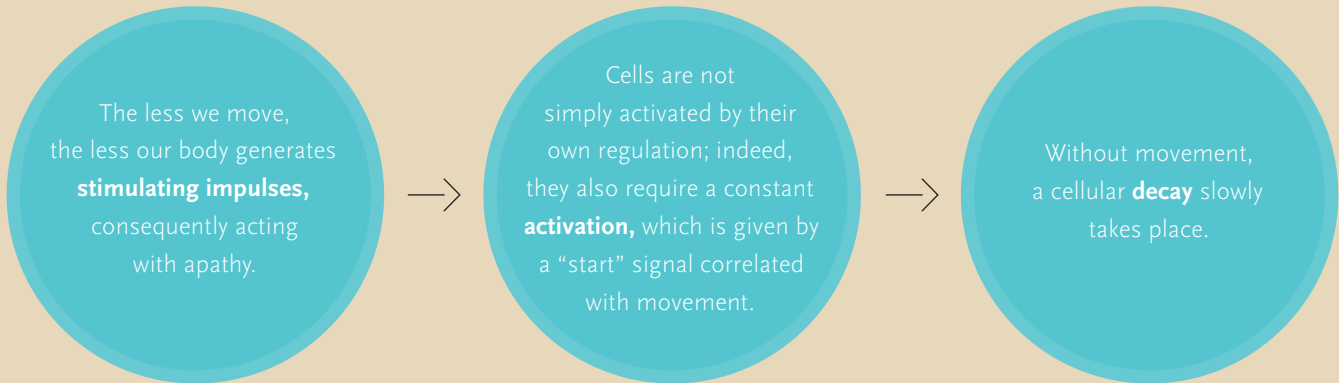

1. ... it's a biophysical procedure of vascular and cellular training
2. ...it uses electromagnetic induction to regulate the ionic flow within the body  
(blood vessels, tissues and cells)
3. ...it resets the metabolic activities

The electromagnetic impulses of Cellvital-Homecare are able to **satisfy the natural impulse to movement**, therefore determining all the positive effects that are typical of an active movement.

# Why is Cellvital-Homecare therapy so important?

//////////////////////////////////// all YOU need is MOVEMENT //////////////////////////////////////

## There's no life without movement.

- // Each movement impulse activates various neurotransmitters, such as calcium ions, leading the mitochondria (our energy factories) to produce a sufficient amount of energy.
- // The electromagnetic impulses produced by Cellvital-Homecare mimic these natural impulses through a request of calcium ions' inclusion and a subsequent production of energy within the mitochondria.
- // Regular use of the Cellvital-Homecare stimulation therapy can obviate the lack of physical activity and thus compensate the cellular deficit that comes with it.

### < // IMPORTANT TO KNOW:

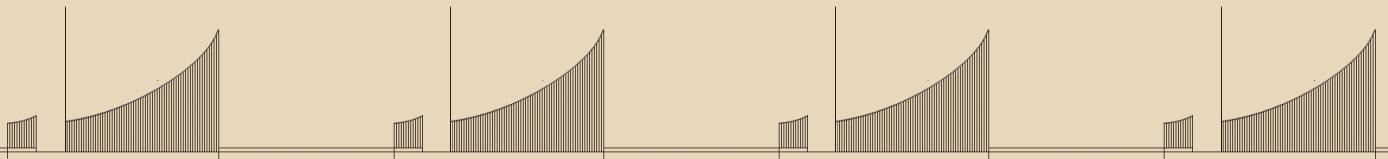

*This is particularly important for people that don't have time to dedicate to movement on a daily or regular basis, such as managers, housewives, professionals, students, as well as sick people or individuals with reduced movement ability (i.e. disabled people).*

# The technology

chemical  
free

action

safe

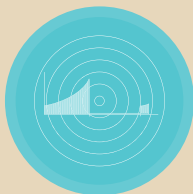

*Decades of interdisciplinary research and targeted scientific studies led to the perfect reproduction of the natural impulse to movement. We call this phenomenon: E-Function Impulse (Exponential Function).*

# Cellvital-Homecare THERAPY: an effective and safe technology

//////////////////////////////////// Science and research //////////////////////////////////////

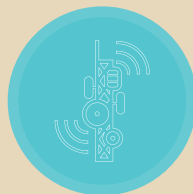

## 1. Exponential Function

The shape of the magnetic impulse is essential to activate the signal induced by the device. The Exponential Function curve is “the expression of all living things”. All the impulses used by the Cellvital-Homecare technology operate according to this Exponential Function curve. This is a singular impulse curve that recreates the natural processes within the body and guarantees a reinforced ionic alignment and an accelerated ionic transport, which has a fundamental role in cellular revitalization.

## 2. Electromog-free therapy

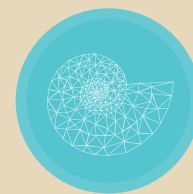

Thanks to an accurate selection of the materials' quality and to a broad endowment of scientific competence, the Cellvital-Homecare technology is electromog-free. The TCO measurement detected is thus totally compliant to regulations:  $< 0.5 \text{ v/m}$ . The maximum allowed level is indeed  $10 \text{ v/m}$ . It is worth noticing that this value is exceeded by many electromagnetic devices by 15–20 times.

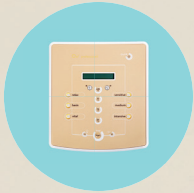

## 3. The Fibonacci Code, the key to perfect blood circulation

The Fibonacci Code of the Cellvital-Homecare signal allows to access the vascular system circulation with optimal timing and near each organ and cell.

- // Optimization of tissues oxygen consumption
- // Regulation/new regulation at the expense of the Autonomic Nervous System

# Cellvital Homecare: the device and its accessories

*CV-HC Control unit  
Cellvital generator of  
EM impulses*

*CV-HC Mat  
applicator for the  
whole body*

*CV-HC Pillow  
For targeted  
treatment of:  
shoulder, back, knee,  
hands, ...*

*CV-HC RapidAct  
For specific  
treatment of:  
teeth, tendons,  
acupuncture points*

*CV-HC EyeCare  
For specific  
treatment of the eye area  
(swelling, bags under the  
eyes, ...)*

*CV-HC HeadCare  
For targeted  
treatment of  
tinnitus*

*CV-Homecare  
Single Set*

# How do I use it and what are the benefits?

//////////////////////////////////// This is how you activate your cellular energy //////////////////////////////////////

// The application period is normally of 8 minutes twice a day

// In a healthy person, the application's effect lasts  
up to 8 hours

// To reach a healthy body condition, we recommend a regular use of the device.

// Details about applications and suggested settings, as well  
as an indication list, can be found in the Cellvital-Homecare set.

// People affected by a disease might extend the number of daily  
applications up to 3 times per day. The intensity level and  
the duration of treatment are determined on the basis of  
the particular disease that must be treated.

For example,  
in a case of gonartrosis  
(knee osteoarthritis),  
the first positive results of the  
treatment can be seen after  
approximately **2 weeks** of  
applications; after 6 weeks of  
treatment, the condition  
appears significantly  
improved. \*

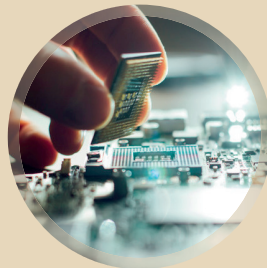

\* Recommendations about the intensity levels and the application periods are based on an extensive knowledge of this field and on studies that were conducted under medical and scientific supervision.

# An ingenious discovery or mental clarity following a stroke of fate?

Cellvital: the story

As the successful entrepreneur and multiple patent holder Dr. E.G. Fischer had retired after a stroke in a cottage in Voralberg, no one could have guessed that the development of one of the most **ingenious inventions** in medical technology would have emerged as a result.

Healed by the power of a less sophisticated electromagnetic field, he recruited an interdisciplinary research team, which includes personalities like Prof. Dr. H. King of the Technical University of Munich, the orthopedic surgeon Prof. R.O. Becker of the State University of New York and the chemist and twice Nobel Prize winner Linus Pauling. As a result, they developed a ground-breaking action model based on electromagnetic pulses. The extremely weak magnetic fields are only used as transporters to easily convey biologically active frequencies in the form of complex information packages in each cell of our body.

Special emphasis was placed on an internationally patented pulse shape, which can be represented as an “exponential function” and which has been demonstrated to be involving all chemical and physical processes of nature itself. This also explains why the MIR space station was equipped with this ground-breaking technology.

After almost three decades of scientific basic research and a number of clinical trials, we here present the **latest generation** of devices under the brand name of Cellvital. The company’s philosophy aims at continuous development, **highest quality** and especially **user-friendliness**.

„Human health depends on the health of its cells.“ //

< / DR. EG. FISCHER

# The benefits

The Cellvital-Homecare stimulation through magnetic fields is able to reach our body without meeting any resistance; the electromagnetic signals (which are in themselves the information that needs to be passed down our body) can be transported up to our 100 trillion body cells.

This determines a positive effect in terms of our body's bioelectricity, by stimulating the blood circulation and subsequently the related cell tension and energy production (ATP production within the cell).

Better sleep

Better  
concentration

Detox

Endurance  
capacity

## Correct cell tension

cellular  
youth indicator

Even though we can resort to a different medical specialist for each organ of our body, it is obvious that the primary cause of all diseases can be traced back to a deficit of cell functionality. Tiredness and weakness are always expressions of a modified electrical tension of the cell. Elderly people frequently manifest this in the lower part of their body.

If the electrical  
tension decreases  
below a certain  
level, healthy cells  
convert into  
sick cells.

## Better circulation

more circulation,  
more oxygen

Environmental conditions, electrosmog, stress, work pressure or chronic diseases have a bad influence on oxygen transport and oxygen consumption within our body (red blood cells = oxygen transport in the blood). On a long term, a lack of oxygen occurs inside our tissues (organs, muscles, skin, ...). Whenever the microcirculation doesn't work properly, chronic diseases are endorsed.

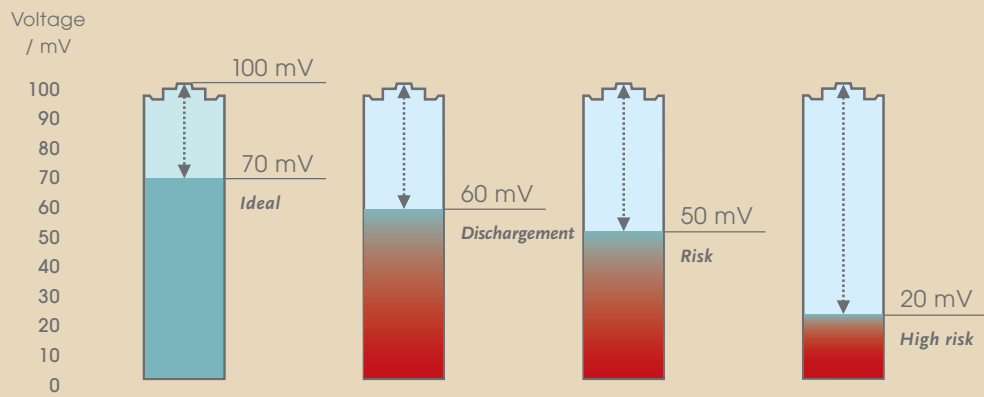

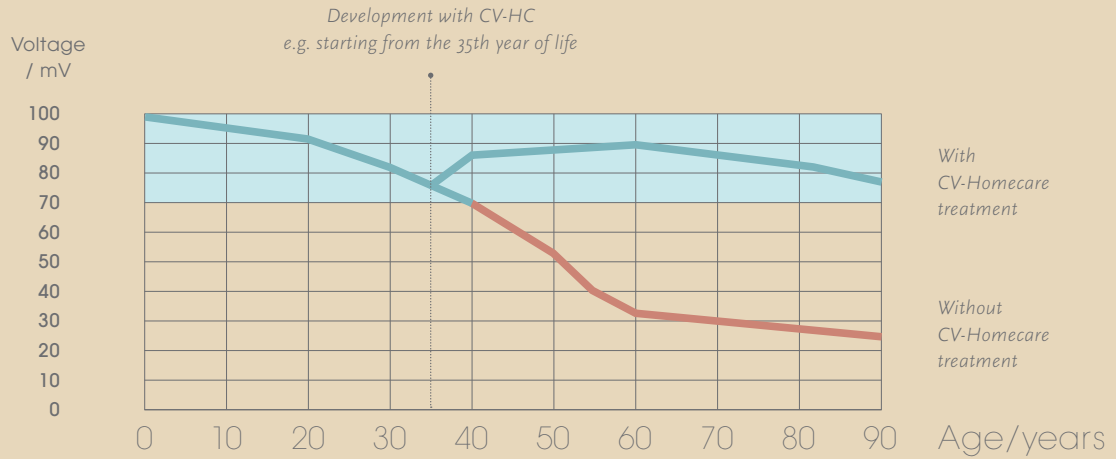

## Increased ATP (energy)

the currency  
of our body

Humans need energy to perform their daily activities; it is for this reason that ATP\* must be produced daily by our body. Whenever there is an increase in age, stress, work load or even diseases, ATP\* production usually decreases.

\* ATP (Adenosine Triphosphate) //

In biology ATP is considered to be the energy of life. ATP is the "energy currency" of every cell in our body. It is the molecule with the most energy and most efficient for storing energy. ATP is produced in the mitochondria of our body cells.

The membrane potential of a healthy cell is between -70 and -110 mV

### THE MEMBRANE POTENTIAL IS REPRESENTED AS A BATTERY

The optimal membrane potential is between -100 and -70 mV. When the voltage is below -60 mV, the cell appears weakened. If the voltage decreases even more, the risk of developing a disease substantially increases. Cancer cells usually have a membrane potential below -20 mV.

Prof. Dr. Fischer AG

Handy and  
easy to use

Works as a  
catalyzer to increase  
**bone density** and  
**muscle mass**

Improves  
**metabolism** and  
the overall cellular  
**regeneration**

Prevents  
**inflammation** and  
reduces the activity  
of the enzymes  
that determine  
inflammation

The advantages of  
Cellvital-Homecare  
application for your  
own health

Increases  
the **synthesis of**  
**cell proteins**

Alkalizes the  
pH producing an  
increased oxygen  
consumption  
(up to 200%)

Improves  
blood circulation  
by expanding  
the **arteries** and  
the **capillaries**

Stimulates  
the production  
of **endorphin** and  
**serotonin**

# USERS EXPERIENCES

//////// Different goals according to age and life style. These people are using Cellvital and they here tell you all about their experiences ... //////////

## Werner

40 years old,  
scientist

*I got to know the Cellvital-Homecare technology 2 years ago and I was immediately convinced by the product. My mother was experiencing a severe hip pain and was scheduled to undergo a hip replacement in a few weeks. After a few weeks of treatment, my mother's pain completely disappeared.*

*Following this episode, I decided to use the device myself, starting with a couple of applications per day, and I was really excited by the results. I rapidly learnt how to **significantly improve my endurance and muscle quality**. As a biologist, I am obviously well aware of the importance of proper blood flow for muscular performance.*

## Gussi

60 years old,  
businesswoman

*I used to suffer from a severe shoulder pain. At night I couldn't lay and sleep on either side, but after more or less 2 weeks of therapy with Cellvital-Homecare the **pain** was simply gone on both sides. I also noticed that my **tinnitus** improved at least by 50 %, my **sleep** is more relaxed and deep, and, especially, my soul was also touched by the device!*

*Besides my experience, I can also report those of my family:*

- // *My dogs: the youngest one always comes near me while I'm using the device!*
- // *My husband loves the mat too: when he lies down on it, he usually falls asleep for hours and then wakes up rested and refreshed.*
- // *All my kids are passionate about the mat; my son lies down on it right after doing sport and, since he started, he hardly ever experiences muscular pain.*
- // *My youngest daughter had to take her driving test and she told me it was a shame she couldn't place the mat onto the car seat: "Mom, I really need the energy!"*

## Bob Bonkowski

Foot Trainer,  
Sport Therapist

*Skier and sport trainer with decades of international experience in "feet dynamic" and running techniques.*

*Basically, one of my main tasks is to help my clients optimize their osteo-muscular function in order to achieve a greater efficiency as they grow older.*

*Following a **painful neck injury** while I was playing ice hockey, I found out about the Cellvital-Homecare assistance system. I was impressed by how quickly and easily I was back on my feet and since then I have been suggesting the use of the device to my clients.*

## Dr. Oz

Prof. at Columbia University USA, author and TV expert New York, USA

In his TV show “Dr. Oz Show”, he presented the pulsed magnetic therapy as “the revolutionary cure for pain” and commented its effect by saying:

“With this, it is possible to achieve a deep recovery, an **improved oxygenation** and make the recovery process start. Those who use it, not only feel better, they get better”.

## Dr. Wolfram Haas

General practitioner Internist Frankfurt, Germany

Over the course of 15 years, he was able to collect several positive experiences by using the Cellvital-Homecare technology:

“Through this device, we are able to rebuild a **healthy cell tension** within a short amount of time. This has several effects on the body: it improves cell communication, increases energy production in the mitochondria and re-equilibrates the whole metabolism. By using this therapy, we improve blood circulation and thus blood transport up to the smallest vessel. All these factors promote **self-recovery**”.

## Dr. Michael Zellner

Chief - Urologist, expert nutritionist and user of magnetic field therapy Bad Fussing, Germany

“Blood vessels change, and we are as old as our blood vessels. Endothelial cells \* play a major role in the development of vascular and cardiovascular diseases. Training at the blood vessels’ level with Cellvital-Homecare therapy represents the optimal method to **preventively and therapeutically protect and regenerate our vascular system.**”

\* Endothelial Cells: cells that internally cover the walls of blood and lymphatic vessels.

## Dr. Emmanuele Aragona

Chief Regenerative Medicine, Surgery Milan, Italy

“Cellvital-Homecare therapy is a therapeutic innovation in the field of regenerative medicine. This type of **electromagnetic induction** represents a great tool for the treatment of skin lesions, mucous membrane inflammation and for a collective action”.

## Dr. Michael Foreit

Specialized in Osteopathy, Regenerative Medicine North West Indiana, USA

“In Paramedic medicine, we usually deal with patients coming off accidents. We thus need less invasive methods to restore function after nerve damages, fractures and lesions/wounds. We usually need a miracle! I am always astonished by the rapid **regenerative effect** of pulsed magnetic fields’ therapy”.
